### Master of Science in Respiratory Care (MSRC)

The Master of Science in Respiratory Care (MSRC) degree is a 36-hour, online post-professional program requiring 24-hours of core Respiratory Care (RC) courses plus 12-hours in one of the three concentrations – Clinical Specialist, Polysomnography, or Leadership. Students can also combine two concentrations, with one serving as a minor. The MSRC program will offer respiratory therapists the opportunity to study advanced respiratory care topics within specific core and concentration courses. Students learn from doctoral prepared graduate faculty on subjects relevant to the field of Respiratory Care. The program will prepare respiratory therapists for leadership roles in education, research, healthcare administration, industry, sleep, and other specialized healthcare fields. . With its fully online format, the MSRC program accommodates the schedules of working professionals, making it an ideal choice for respiratory therapists seeking career advancement in a way that aligns with their personal and professional lives

#### MSRC Mission Statement

The Master of Science in Respiratory Care (MSRC) is dedicated to excellence in teaching and research for Registered Respiratory Therapists (RRT) seeking current and emerging knowledge that may offer career advancement opportunities involving advanced leadership, management, research, clinical practice and education in the discipline of respiratory care.

#### MSRC Vision Statement

To be the respiratory care graduate program of choice for students, faculty, alumni and employers. To produce graduates with post-professional, respiratory care educational experiences that will lead to professional advancement.
